

Asset Pipeline 2

This next step only applies if you have a project that was made in the 2018 version or older, so most of you can skip this specifically.

But if you have, make sure to open up your “**Project Settings**” window, go to “**Editor**”, and make sure that “Asset Pipeline Mode” is set to Version 2.

Make sure that Cache Server is disabled while you’re at it.

So! Let’s explain the process of **Converting to Android**.

Revision #4
